BIOLOGY REVIEW Mystery Picture

Directions: Find the hidden picture by correctly answering the questions below. Color the numbered squares the color of the corresponding answer to each question.

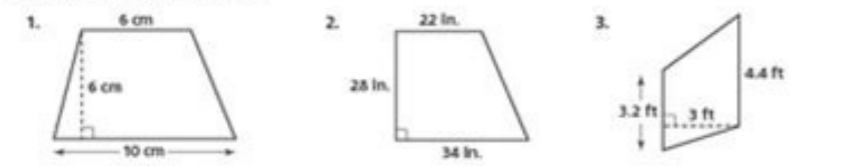

Number(s)	Question	Answer Choices		
1-3	Which of the following types of cells would contain a nucleus?	Bacteria Dark blue	Animals Light blue	Plant Red
4	Which of the following types of cells would NOT have a cell wall?	Animal Dark blue	Plant Light blue	Bacteria White
5-12	Which of the following is found in all cells?	Cell membrane White	Cell wall Light blue	Mitochondria Light green
13	Which of the following organelles is responsible for ATP synthesis?	Ribosomes Red	Mitochondria Light blue	Golgi apparatus Dark purple
14-18	Which of the following kingdoms of organisms includes prokaryotes that live in harsh environments?	Eubacteria White	Archaebacteria Red	Protists Dark blue
19-20	Which of the following kingdoms includes a diverse group of mostly unicellular eukaryotes that lack complex organ systems and live in moist environments?	Plants Red	Fungi Yellow	Protists Dark blue
21-22	If two organisms are classified in the same order, they must also be classified in the same _____.	Family Dark purple	Genus Light blue	Class White
23-24	Which of the following is NOT considered a living thing?	A virus Light blue	A bacterium Dark blue	
25-26	Which of the following would be an example of an abiotic factor?	Precipitation Light blue	Temperature Dark blue	Both White
27-28	If an ecologist was studying the interactions among the populations of organisms in a grass area, which of the following would they be studying?	A biome Orange	An ecosystem Dark purple	A community Red
29-30	The place where an organism lives is called its _____.	Habitat Light blue	Niche Dark blue	Community White
31-34	Which of the following biomes is characterized by grasslands and very little precipitation and trees?	Tundra White	Savanna Dark blue	Desert Red
35-37	Which of the following aquatic biomes is characterized by its extreme fluctuations in temperature and salinity?	Open ocean White	Freshwater Dark blue	Estuaries Light blue
38-40	_____ is a mode of evolution in which species diversity occurs in a relatively short amount of time.	Adaptive radiation Dark green	Convergent evolution Dark blue	Divergent evolution White
41-44	_____ are proteins that act as biological catalysts speeding up reactions in living things.	Enzymes White	Substrates Light green	Reactants Light blue
45-49	Which macromolecule acts as the primary and immediate source of energy for living things?	Protein Red	Lipids Light green	Carbohydrates Dark green

© Science from The Heart, 2007

Name _____ Class _____ Date _____

Practice 10-2 Area of Trapezoids, Rhombuses, and Kites

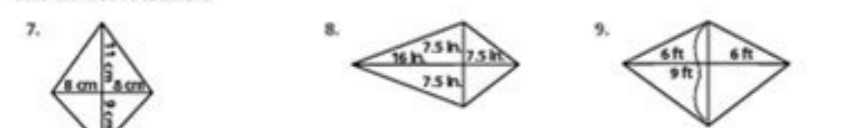

Find the area of each trapezoid.

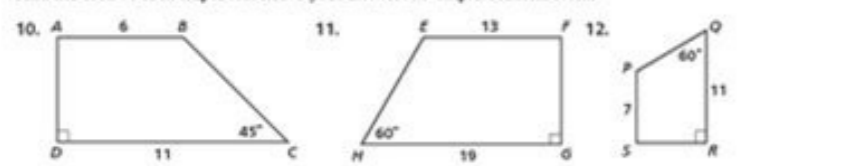

Find the area of each rhombus.

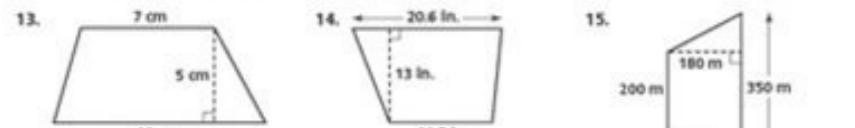

Find the area of each kite.

Find the area of each trapezoid. Leave your answers in simplest radical form.

Find the area of each trapezoid to the nearest tenth.

Common Cooking Vocabulary #2

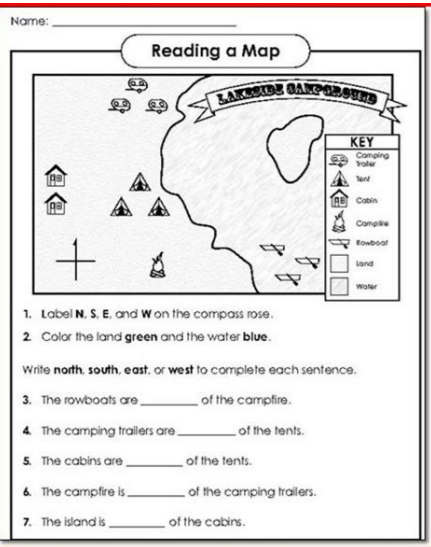

boil	cube	mince	stew
bread	dice	mix	stir fry
broil	grill	peel	toast
brown	grind	simmer	whip

- _____ 1. To stir ingredients together with a spoon, fork, or mixer until well combined.
- _____ 2. To cook in liquid that is just below the boiling point.
- _____ 3. To cook by direct heat, under a broiler or over hot coals.
- _____ 4. To brown with dry heat in an oven or toaster.
- _____ 5. To cut into to very small pieces, smaller than chopped or diced pieces.
- _____ 6. To simmer slowly in enough liquid to cover.
- _____ 7. To heat a liquid to the point that bubbles break continuously on the surface.
- _____ 8. To cook on a rack over hot coals or other direct heat source that simulates coals.
- _____ 9. To reduce a food to fine particles using a blender or food processor.
- _____ 10. To coat with flour, then dip into beaten egg or milk, then coat with crumbs from crushed stale bread, cereal or crackers.
- _____ 11. To cook over medium or high heat until surface of food browns or darkens.
- _____ 12. To pull away, strip or cut off the outer covering of a fruit or vegetable.
- _____ 13. To beat rapidly with a wire whisk, or mixer to lighten and increase volume.
- _____ 14. To cut into small squares of 1/8" to 1/4".
- _____ 15. To cook in a frying pan or wok over high heat in a small amount of fat, stirring constantly.
- _____ 16. To cut a solid food into squares of about 1/2" in size or larger.

Naming eAAjA The book covers fractions mixed numbers adding and subtracting like fractions adding and subtracting unlike fractions and comparing fractions. Use the electron microscope images to determine the actual size and / or the magnification of the image,there are some model answers for this worksheet here: Alternative worksheet 2 model answersAdditional resources:An older activity worksheet for studentsUse of microscopes - Nikon MicroscopeU - some excellent resources and images In order to continue enjoying our site, we ask that you confirm your identity as a human. Follow these steps carefully then complete the calculations on the worksheet. The scale bar is the best way to show the size of the original object because whatever magnification of the image the scale bar still shows the size accurately in proportion to the object. Each lesson plan comes with every resource needed to teach the lesson. Derivative worksheet with answers pdf. Detailed Solutions provided for all the 4th Grade BIM Textbooks Questions include Questions from Exercises Practice Tests Review Tests Cumulative Assessments etc. V tan8x cos-8 r 10. Organic Chemistry Naming Substituted Hydrocarbons Worksheet Lesson Planet Chemistry Worksheets Word Problem Worksheets Algebra Equations Worksheets Designated by a structural formula each compound must be given a characteristic and unique name. It has less guidance for students so may suit brighter students. Fx ex sinx 3. Derivative chain rule practice worksheet. Whatever size you printer prints the page, you should calculate the same size. This is a step by step explanation of the calculationClick the eye icon to reveal another example to try.Activity 2 Calculating the size of a specimen using the scale bar on the imageSometimes it is the actual size of the specimen it's important. Van Leeuwenhoek made similar calculations to estimate the size of cells in the 1600s, but he did not have a scale bar.Click the eye icon to see a step-by-step calculation of the sample size using the scale bar.Activity 3 Calculating the size of a sample using image magnificationSometimes there is no scale bar, but the image magnification is given. displays three steps to calculate the size of the image using magnification.Students can complete two examples of each cycle on the Magnification and Size spreadsheetActivity 4 4 Uncertainties in these measurements with rulesIf you measured this scale bar, would you measure it as 52 or 53 mm in length?In the IB strictly the length should be recorded as 52 mm +/- 1 mm. Uncertainty. Uncertainty.
